

User login missing in Windows XP after installing HR client

Problem Summary	No user login exists in Windows XP after installing the Historical Reports client.
Error Message	None.
Possible Cause	The Windows XP system hides the Administrator user icon when no other user account exists in the system.
Recommended Action	Do one of the following: <ul style="list-style-type: none"> • Restart the machine. When you see the Windows XP login screen (with the user icon turned on), press Ctrl-Alt-Del twice and then choose the Administrator User ID. • Create a new user account in the XP system other than Administrator.
Release	Release 7.0(1)
Associated CDETS #	None.
