

Error 500: Error Initializing Velocity

Problem Summary	In trying to access the link listed below, an error message is received. <a href="http://<server name>:7000/CVP/Licensing">http://<server name>:7000/CVP/Licensing
Error Message	Error 500: Error initializing Velocity: java.lang.Exception: Unable to configure AvalonLogSystem: java.security.AccessControlException: Access denied (java.io.FilePermission /opt/WebSphere/AppServer/profiles/AppSrv01 read)
Possible Cause	This is due to the Use Java 2 security to restrict application access to local resources being enabled. When enabled, it prevents the VXML Server to run.
Recommended Action	<p>Modify the setting via the WebSphere Application Server (WAS) Integrated Solutions Console.</p> <p>Accessing the Integrated Solutions Console</p> <ol style="list-style-type: none"> 1. From a web browser enter the following link:<a href="http://<server name>:9060/ibm/console">http://<server name>:9060/ibm/console 2. Click the Security link in the left frame after you log in. 3. Click Secure administration, applications, and infrastructure. 4. In the Java 2 security section uncheck Use Java 2 security to restrict application access to local resources. 5. Click Apply.
Release	Release 7.0(2)
Associated CDETS #	None.
