

**Error 500: Error Initializing Velocity**

<b>Problem Summary</b>	In trying to access the link listed below, an error message is received. <a href="http://&lt;server name&gt;:7000/CVP/Licensing">http://&lt;server name&gt;:7000/CVP/Licensing</a>
<b>Error Message</b>	Error 500: Error initializing Velocity: java.lang.Exception: Unable to configure AvalonLogSystem: java.security.AccessControlException: Access denied (java.io.FilePermission /opt/WebSphere/AppServer/profiles/AppSrv01 read)
<b>Possible Cause</b>	This is due to the <b>Use Java 2 security to restrict application access to local resources</b> being enabled. When enabled, it prevents the VXML Server to run.
<b>Recommended Action</b>	Modify the setting via the WebSphere Application Server (WAS) Integrated Solutions Console.  Accessing the Integrated Solutions Console  <ol style="list-style-type: none"> <li>1. From a web browser enter the following link:<a href="http://&lt;server name&gt;:9060/ibm/console">http://&lt;server name&gt;:9060/ibm/console</a></li> <li>2. Click the <b>Security</b> link in the left frame after you log in.</li> <li>3. Click <b>Secure administration, applications, and infrastructure</b>.</li> <li>4. In the Java 2 security section uncheck <b>Use Java 2 security to restrict application access to local resources</b>.</li> <li>5. Click <b>Apply</b>.</li> </ol>
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
