

**VXML Server Console Displays No Information**

<b>Problem Summary</b>	When starting the Call Server, the console displays no information on VXML Server Call Services at all.
<b>Error Message</b>	No message displayed
<b>Possible Cause</b>	This is most likely caused by not having the VXML Server Call Services Web application archive file, audium.war, in the correct directory.
<b>Recommended Action</b>	This could have been due to not installing VXML Server Call Services or choosing the wrong directory in the VXML Server installer for the Call Server's Web application archive directory.
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
