

## VXML Server Displays Information of an Old Version

<b>Problem Summary</b>	When starting the Call Server, the VXML Server Call Services displays information of an old version.
<b>Error Message</b>	Information displayed about an older version.
<b>Possible Cause</b>	A prior version than 4.0 of the VXML Server software is still installed.
<b>Recommended Action</b>	If a prior version of VXML Server software was installed on the same Call Server, it is likely that the old expanded Web application still resides in the Call Server. Either delete the old expanded directory or use the Call Server console to decommission the old Web application and load the new Web application archive (WAR) file.
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
