

**VXML Server Sample Application Displays Page Not Found**

<b>Problem Summary</b>	When running the Hello World sample application to test if VXML Server Call Services is running, the page could not be found.
<b>Error Message</b>	Page not found.
<b>Possible Cause</b>	This URL would be valid only if the Web browser were running on the same machine as Call Services.
<b>Recommended Action</b>	The URL to be entered to obtain the Hello World application is: <a href="http://localhost:PORT/Audium/Server?audium_application=&gt;HelloWorld">http://localhost:PORT/Audium/Server?audium_application=&gt;HelloWorld</a> This URL would be valid only if the Web browser were running on the same machine as Call Services. If it is a different machine, the appropriate IP address should be used instead of "localhost". Additionally, the port on which the Call Server is listening must be used. Use the netstat command to determine the port number.
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
