

Verify_Cisco_Diagnostic_Framework_Portico

Do this for the Unified CCE Call Server and Unified CCE Data Server, Sides A and B. This procedure applies only to golden templates.

Procedure

Step 1 Open the command prompt and enter `cd C:\`.

Step 2 Enter `cd icm\serviceability\diagnostics\bin` and press Enter.

Step 3 Enter `DiagFwCertMgr /task:CreateAndBindCert /port:7890` and press Enter.

Step 4 Go to Start -> Run and enter `services.msc` to open the Services tool. Make sure the Cisco Diagnostic Framework service is running. If it is not, start it.

Step 5 Open Diagnostic Framework Portico: Start > Programs > Cisco Unified CCE Tools > Diagnostic Framework Portico. Then make sure you can log in to the Diagnostic Framework Portico using domain user credentials.
