

Verify_route_patterns_on_CM_server

Use this procedure to verify that you have the route patterns 8005557777 and 7005557777 defined on the Unified CM server for the Comprehensive call flow exercise.

Procedure

Step 1: Point a browser to the Unified CM IP address or hostname. The Product Selection window opens.

Step 2: Select Device > Trunk > Find and verify that you have route patterns 8005557777 and 7005557777 defined. Scroll down and examine the SIP Information section Destination Address field. If the route patterns are not set up properly, see the topics related to modifying the Comprehensive exercise for VoIP phones and defining route patterns.
