

## Verify\_voice\_applications\_are\_running\_on\_VXML\_Server

Verify that the HelloWorld and customhelloworld voice applications are running on the VXML server.

### **Procedure**

**Step 1:** Log in to the Unified CVP server and using a file browser, go to C:\Cisco\CVP\VXML Server\admin.

**Step 2:** Double-click status.bat.

The command window that opens provides the status of HelloWorld and customhelloworld. If they are not Running, refer to the topics related to accessing the VXML Server administrative batch files.
