

Voice Browser Not able to fetch files with dynamic file extensions

Problem Summary	Voice Browser Not able to fetch files with dynamic file extensions
Error Message	badftch error message
Possible Cause	Head Request being made before the get or post request.
Recommended Action	Update the VoiceBrowser.properties using CLI command i.e to make dynamic file extension entry into com.cisco.voicebrowser.dynamic.file.extensions=jsp ircgi nohead Doing so the HEAD request will never be send for the dynamic file extension files.By default we support three extensions jsp,ircgi and nohead restart the Engine or Node Manager for changes to take affect.
Release	Release 8.0(1)
