

"Invalid user name or password" when attempting to log in to WebSetup

Problem Summary	You expect to be able to log in and you get "Invalid user name or password."
Error Message	"Invalid user name or password".
Possible Cause	Either you are not providing valid Active Directory Domain User credentials or you are not a local machine Administrator, or both.
Recommended Action	Make sure that not only are you logging in as a valid Domain User in the domain, but that you are also a local machine Administrator.
Release	Release 8.0(1)
