

You_receive_the_message_customhelloworld:_Validation_failed._Please_see_Call_Studio_Problems_view_for_details

Problem Summary	You attempt to validate the customhelloworld application and receive the message: customhelloworld: Validation failed. Please see Call Studio Problems view for details.
Error Message	NA
Possible Cause	NA
Recommended Action	<p>Examine the "Call Studio Problems" tab at the bottom of the <i>Builder</i> window. You see the message: <i>The value of the setting "Caller Input" cannot be left blank or contain the following characters: <, >, ", ', and &.</i></p> <p>Scroll the Call Studio Problems tab to the left and you will see the project name and the element "Location" that contains the problem. Click the element referred to in the error message (in this case: CVP Subdialog Return_01). Note that <i>Caller Input</i> is blank. Enter yes in the Value column for Caller Input so the application returns a value when the application receives a call.</p>
Release	NA
Associated CDETS #	None.
